EXPERIENCE

Software Engineer

May 2020 - Present

Cisco Systems Inc. | Vancouver, BC

This fullstack role is very hands-on with code and infrastructure. Responsibilities included configuring AWS cloud infrastructure, configuring Concourse CI/CD pipelines, monitoring systems with Grafana, maintaining high-throughput security reporting systems in JVM languages (java, kotlin, clojure), React, and bash, digesting complex technical requirements into actionable tasks.

Key Accomplishments:

- Collaborated across multiple (5+) teams to flesh out requirements and implement the reporting components of the intrusion protection system
- Improved developer team experience by adding CI/CD and monitoring functionality like rollback pipelines, staging environments, and Grafana deployment annotations

Front End Consultant (Contract)

Oct. 2018 - Dec. 2018, Feb. 2020 - May 2020

CMLS Financial | Vancouver, BC

- Made substantial product contributions with high business impact
- Drive conversations across the Product, Business, and Engineering units to a conclusion when developing user workflows
- Enabled front end development by leading React workshops, re-architecting components, and challenging prescriptive engineering choices

Fullstack Developer

Jan. 2019 - Jan. 2020

Briteweb | Vancouver, BC

- Collaborated with designers and product managers end-to-end, transforming features into concrete requirements, acceptance criteria, and test cases
- Built reporting tools (Laravel, vue.js) for an education platform including a Survey application, Spreadsheet-style Editor for large datasets
- Configured GitLab CI/CD pipelines for automated delivery and integration on the AWS platform

Software Engineer

Jan. 2018 - Aug. 2018

Grow Technologies Inc. | Vancouver, BC

Responsible for feature development and maintenance on a banking compliance application built in React.

Key Accomplishments & Responsibilities:

- Transform broad ideas into robust product requirements
- Re-launched the application with a UI/theme redesign using Styled Components as well as Content Security Policies
- Early prototyping of process improvements like release logs to deliver value to dependent teams
- Delivered high business impact features like Pre-Authorized Bill Switching, Audit Log, and End User Configurability

Teaching Assistant (Contract)

Jun. 2017 - Jul. 2017, Jan. 2019 - Apr. 2019

British Columbia Institute of Technology. | Burnaby, BC

EDUCATION

British Columbia Institute of Technology | Diploma in Computer Systems Technology

Completed Dec. 2017

- GPA: 88%

SKILLS

React, Webpack, Redux, Tailwindcss, vue.js, Node.js, Laravel, SQL, Kotlin, Java, Clojure, Typescript, Terraform, AWS, CI/CD
